

AUTHOR INDEX

- Achterberg, A.** Models for the Circumstellar Medium of Long Gamma-Ray Burst Progenitor Candidates. *A. J. van Marle, N. Langer, A. Achterberg, & G. García-Segura*, 1
- Aloy, M. A.** Relativistic Outflows in Gamma-Ray Bursts. *M. A. Aloy & M. Obergaulinger*, 96
- Arthur, S. J.** Wind-Blown Bubbles and HII Regions around Massive Stars. *S. J. Arthur*, 64
- Chevalier, R. A.** Circumstellar Interaction Around Type Ib/c Supernovae and the GRB Connection. *R. A. Chevalier*, 41
- Chiță, S. M.** The Evolution of Circumstellar Medium around Rotating Massive Stars. *S. M. Chiță, A. J. van Marle, N. Langer, & G. García-Segura*, 80
- Corcoran, M. F.** Eta Car and Its Surroundings: the X-ray Diagnosis. *M. F. Corcoran & K. Hamaguchi*, 29
- DeLaney, T.** Cas A: The Bright X-ray Knots and Oxygen Emission. *D. Dewey, T. DeLaney, & J. S. Lazendic*, 84
- Della Valle, M.** Supernovae and Gamma Ray Bursts. *M. Della Valle*, 104
- Deng, J.** Supernovae and Gamma-ray Bursts. *P. A. Mazzali, K. Nomoto, K. Maeda, & J. Deng*, 23
- Dewey, D.** Cas A: The Bright X-ray Knots and Oxygen Emission. *D. Dewey, T. DeLaney, & J. S. Lazendic*, 84
- Dwarkadas, V. V.** Supernova Explosions in Winds and Bubbles, with Applications to SN 1987A. *V. V. Dwarkadas*, 49
- Eldridge, J. J.** Massive Binaries, Wolf-Rayet Stars and Supernova Progenitors. *J. J. Eldridge*, 35
- Fesen, R. A.** Evidence for Pre-SN Mass Loss in the Galactic SNR 3C 58. *G. C. Rudie & R. A. Fesen*, 90
- García-Segura, G.** Models for the Circumstellar Medium of Long Gamma-Ray Burst Progenitor Candidates. *A. J. van Marle, N. Langer, A. Achterberg, & G. García-Segura*, 1
- García-Segura, G.** The Evolution of Circumstellar Medium around Rotating Massive Stars. *S. M. Chiță, A. J. van Marle, N. Langer, & G. García-Segura*, 80
- García-Segura, G.** Preface. *G. García-Segura & E. Ramírez-Ruiz*, v
- Hamaguchi, K.** Eta Car and Its Surroundings: the X-ray Diagnosis. *M. F. Corcoran & K. Hamaguchi*, 29
- Hoffman, J. L.** Polarized Line Profiles as Diagnostics of Circumstellar Geometry in Type II_n Supernovae. *J. L. Hoffman*, 57
- Humphreys, R. M.** The Circumstellar Environments of the Cool Hypergiants: Implications for the Mass Loss Mechanism. *R. M. Humphreys*, 6
- Hwang, U.** The Cassiopeia A Supernova Remnant in X-Rays. *J. M. Laming & U. Hwang*, 72
- Kotak, R.** Mass loss from Luminous Blue Variables and Quasi-periodic Modulations of Radio Supernovae. *J. S. Vink & R. Kotak*, 17
- Laming, J. M.** The Cassiopeia A Supernova Remnant in X-Rays. *J. M. Laming & U. Hwang*, 72
- Langer, N.** Models for the Circumstellar Medium of Long Gamma-Ray Burst Progenitor Candidates. *A. J. van Marle, N. Langer, A. Achterberg, & G. García-Segura*, 1
- Langer, N.** The Evolution of Circumstellar Medium around Rotating Massive Stars. *S. M. Chiță, A. J. van Marle, N. Langer, & G. García-Segura*, 80
- Lazendic, J. S.** Cas A: The Bright X-ray Knots and Oxygen Emission. *D. Dewey, T. DeLaney, & J. S. Lazendic*, 84
- Maeda, K.** Supernovae and Gamma-ray Bursts. *P. A. Mazzali, K. Nomoto, K. Maeda, & J. Deng*, 23
- Mazzali, P. A.** Supernovae and Gamma-ray Bursts. *P. A. Mazzali, K. Nomoto, K. Maeda, & J. Deng*, 23
- Nomoto, K.** Supernovae and Gamma-ray Bursts. *P. A. Mazzali, K. Nomoto, K. Maeda, & J. Deng*, 23
- Obergaulinger, M.** Relativistic Outflows in Gamma-Ray Bursts. *M. A. Aloy & M. Obergaulinger*, 96
- Ramírez-Ruiz, E.** Preface. *G. García-Segura & E. Ramírez-Ruiz*, v
- Reynoso, E. M.** Radio Observations of SNR Environments. *E. M. Reynoso*, 12

Rudie, G. C. Evidence for Pre-SN Mass Loss in the Galactic SNR 3C 58. *G. C. Rudie & R. A. Fesen*, 90

van Marle, A. J. Models for the Circumstellar Medium of Long Gamma-Ray Burst Progenitor Candidates. *A. J. van Marle, N. Langer, A. Achterberg, & G. García-Segura*, 1

van Marle, A. J. The Evolution of Circumstellar Medium around Rotating Massive Stars. *S. M. Chişă, A. J. van Marle, N. Langer, & G. García-Segura*, 80

Vink, J. S. Mass loss from Luminous Blue Variables and Quasi-periodic Modulations of Radio Supernovae. *J. S. Vink & R. Kotak*, 17
