

# REVISTA MEXICANA DE ASTRONOMIA Y ASTROFISICA

Volumen 12, número especial, febrero 1986

|                                                                                                            |    |
|------------------------------------------------------------------------------------------------------------|----|
| LIST OF PARTICIPANTS                                                                                       | 9  |
| CONTRIBUCIONES HISTORICAS/HISTORICAL CONTRIBUTIONS                                                         |    |
| ASTRONOMY IN BRAZIL                                                                                        | 13 |
| COSMOLOGIA/COSMOLOGY, QSO's AND RELATED OBJECTS                                                            |    |
| COSMOLOGY AND PARTICLE PHYSICS                                                                             | 21 |
| FORMATION OF STRUCTURES IN THE VERY EARLY UNIVERSE                                                         | 31 |
| <i>O. Bertolami Neto, G.C. Marques, and I. Ventura</i>                                                     |    |
| GROWTH OF ISOTHERMAL PERTURBATIONS DURING AND AFTER THE RE-COMBINATION ERA                                 | 38 |
| <i>J.C.N. de Araujo and R. Opher</i>                                                                       |    |
| A COSMOLOGICAL MODEL WITH CYLINDRICAL SYMMETRY                                                             | 46 |
| <i>F.M. Gomide, M.S. Berman, and R.L. Garcia</i>                                                           |    |
| SPECTROSCOPICALLY CONFIRMED QSOs IN A 1.5 DEG <sup>2</sup> AREA NEAR THE SOUTH GALACTIC POLE               | 49 |
| <i>L.E. Campusano</i>                                                                                      |    |
| AN OPTICALLY-THIN, STRONG MAGNETIC FIELD MODEL FOR THE ENERGY DISTRIBUTION AND TIME-VARIABILITY OF BLAZARS | 53 |
| <i>J.R.D. Lépine, M.A. Braz, and N. Epchtein</i>                                                           |    |
| LUMINOSITY SEGREGATION AND LOCAL DENSITY OF GALAXIES IN CLUSTERS                                           | 59 |
| <i>L. Sodré, H.V. Capelato, J.C. Penereiro, and J.E. Steiner</i>                                           |    |
| THE OBSERVATORIO NACIONAL-CENTER FOR ASTROPHYSICS REDSHIFT SURVEY. A STATUS REPORT                         | 63 |
| <i>L.N. da Costa, P.S. Pellegrini, C. Willmer, and M.A. Nunes</i>                                          |    |
| PHOTOPOLARIMETRIC OBSERVATIONS OF THE BL LAC OBJECT PKS 2155-304                                           | 73 |
| <i>H.G. Luna</i>                                                                                           |    |
| THE RELATIVE MOTION OF THE LOCAL GROUP OF GALAXIES TOWARDS THE VIRGO CLUSTER                               | 74 |
| <i>J.A. de Freitas Pacheco</i>                                                                             |    |
| RELATIVISTIC MOTION IN QUASARS                                                                             | 75 |
| <i>M.H. Cohen</i>                                                                                          |    |
| GALAXIAS Y NUCLEOS ACTIVOS/GALAXIES AND ACTIVE NUCLEI                                                      |    |
| KINEMATICS OF SPIRAL GALAXIES; AN OVERVIEW                                                                 | 79 |
| <i>P. Pişmiş</i>                                                                                           |    |
| THE DYNAMICS OF GALACTIC BULGES: NGC 7814 AND NGC 4594                                                     | 89 |
| <i>B. Jarvis and K.C. Freeman</i>                                                                          |    |
| HYDRODYNAMICAL MODELS OF ELLIPTICAL GALAXIES                                                               | 97 |
| <i>V. Garrido Ortega and J.A. de Freitas Pacheco</i>                                                       |    |

|                                                                                                                                    |                                                                                      |     |
|------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------|-----|
| STRUCTURE OF SO's IN CLUSTERS                                                                                                      | <i>R.R. de Carvalho, L.N. da Costa, and P.S. Pellegrini</i>                          | 101 |
| EVOLUTION OF VELOCITY DISPERSIONS IN SOME COLLAPSING SPHEROIDAL DISTRIBUTIONS OF MASS                                              | <i>E. Moreno and P. Pişmiş</i>                                                       | 109 |
| ESTUDIO INTERFEROMETRICO DE LA NUBE MENOR DE MAGALLANES                                                                            | <i>G. Torres y G.J. Carranza</i>                                                     | 114 |
| SPECTROPHOTOMETRY OF THE NUCLEUS OF NGC 7552                                                                                       | <i>H. Dottori, M. Pastoriza, S.J. Codina Landaberry, and J.A. de Freitas Pacheco</i> | 119 |
| NARROW EMISSION LINE REGION OF ACTIVE GALACTIC NUCLEI                                                                              | <i>S.M.V. Aldrovandi</i>                                                             | 124 |
| ON THE TIDAL ORIGIN OF ANGULAR MOMENTUM IN GALAXIES                                                                                | <i>M.B. Mosconi, D. García Lambas, and J.L. Sérsic</i>                               | 131 |
| A GLOBAL MODEL FOR VIOLENT RELAXATION                                                                                              | <i>J.L. Sérsic, D. García Lambas, and M.B. Mosconi</i>                               | 132 |
| VELOCITY ELLIPSES IN THE GALACTIC PLANE: REGIONAL VARIATIONS AND SPECTRAL DISTRIBUTION                                             | <i>S.M. Freitas</i>                                                                  | 133 |
| BV SURFACE PHOTOMETRY OF THE SOUTHERN GALAXIES NGC 6769, 6770 AND 6771                                                             | <i>T. Storchi Bergmann, M.F. Saraiva Schröder, and M.G. Pastoriza</i>                | 134 |
| M82 (NGC 3034): THE NUCLEAR REGION                                                                                                 | <i>L. Carrasco, E. Recillas-Cruz, I. Cruz-González, and J. Melnick</i>               | 135 |
| PHOTOMETRIC MEASUREMENTS OF $WH\beta$ AND $[O III]/H\beta$ OF H II REGIONS IN M83                                                  | <i>M.V.F. Copetti, H.A. Dottori, and M.G. Pastoriza</i>                              | 137 |
| ON THE EFFECT OF RELATIVISTIC ELECTRONS IN THE NARROW LINE REGIONS OF ACTIVE GALACTIC NUCLEI                                       | <i>S.M.V. Aldrovandi, M.L. César, and R.B. Gruenwald</i>                             | 139 |
| MAGNETOHYDRODYNAMIC EFFECTS IN RADIO JETS                                                                                          | <i>E.M. de Gouveia Dal Pino and R. Opher</i>                                         | 143 |
| AN ANALYSIS OF THE INFRARED AND OPTICAL CONTINUA OF SEYFERT 2 GALAXIES                                                             | <i>R.O. Lagua, S.M.V. Aldrovandi, and P. Benevides-Soares</i>                        | 153 |
| HIGH RESOLUTION SPECTROSCOPY OF SOUTHERN SEYFERT GALAXIES                                                                          | <i>I.C. Busko and J.E. Steiner</i>                                                   | 157 |
| EFFECTS OF INTERSTELLAR DUST ON THE PHOTOMETRIC PROPERTIES OF FAINT DISK GALAXIES                                                  | <i>G. Bruzual A. and G. Magris C.</i>                                                | 159 |
| THE EFFECTS OF INTERSTELLAR DUST ON THE SPECTRUM OF DISK GALAXIES                                                                  | <i>G. Magris C. and G. Bruzual A.</i>                                                | 160 |
| <b>ASTRONOMIA ESTELAR/STELLAR ASTRONOMY</b>                                                                                        |                                                                                      |     |
| AN OBSERVATIONAL STUDY OF THE SI-A4200 STARS                                                                                       | <i>P. Didelon</i>                                                                    | 163 |
| NITROGEN-TO-CARBON RATIO IN 70 DWARF HALO STARS                                                                                    | <i>D.F. Carbon, R.P. Kraft, B. Barbuy, E. Friel, and N.B. Suntzeff</i>               | 173 |
| CORRECTIONS AND IMPROVEMENTS IN THE EFFECTIVENESS AND EXTENSION OF THE APPLICABILITY RANGE OF THE MODEL WINK OF ECLIPSING BINARIES | <i>L.P. Ribeiro Vaz</i>                                                              | 177 |
| THE SPECTRUM OF HD 72754                                                                                                           | <i>J.A. de Freitas Pacheco and S.J. Codina Landaberry</i>                            | 184 |
| SPECTROSCOPIC OBSERVATIONS OF Be STARS                                                                                             | <i>J.A.F. Pacheco, S.J.C. Landaberry, and D.F. Lopes</i>                             | 185 |
| A RADIAL VELOCITY STUDY OF TWO EARLY O STARS                                                                                       | <i>G.R. Solivella and V.S. Niemela</i>                                               | 188 |

|                                                                                                    |                                                                                                                                                                                                                                    |     |
|----------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| YELLOW SUPERGIANTS WITH HOT COMPANIONS                                                             | <i>A. Arellano Ferro and B.F. Madore</i>                                                                                                                                                                                           | 189 |
| THE REFLECTION EFFECT IN MODEL STELLAR ATMOSPHERES I: GREY<br>ATMOSPHERES WITH CONVECTION          | <i>L.P. Ribeiro Vaz and Å. Nordlund</i>                                                                                                                                                                                            | 190 |
| PHOTOELECTRIC SCANNER OBSERVATIONS OF CENTRAL STARS OF PLAN-<br>ETARY NEBULAE                      | <i>S.J. Codina Landaberry, J.A. de Freitas Pacheco, L. Viadana, and B. Bazzanella</i>                                                                                                                                              | 191 |
