

ABSTRACT ONLY

ASTRONOMICAL OUTREACH ACTIVITIES AT THE OBSERVATORIO ASTRONÓMICO LOS MOLINOS

Andrea Maciel¹

In this poster we present the different outreach activities that take place at the Observatorio Astronómico Los Molinos (from here on, OALM), located at the outskirts of Montevideo, Uruguay. Face-to-face activities, as well as social networks interactions (which have noticeably increased after 2020) are shown, as a way to take Astronomy and related sciences to as many people as possible.
